

FracLac Name Codes

CAtoTI=cancer_to_tissue_ratio

6. $\bar{D} = \sum D(g)/G_N \forall g \in G$ for D_B

7. STANDARD DEVIATION (σ) for D for D_B

8. MIN for D for D_B

9. MAX for D for D_B

10. *D (D with highest r^2) for D_B

11. * r^2 for D_B

12. *SE for D_B

13. *Y-INT for D_B

17. $\bar{D} = \sum D(g)/G_N \forall g \in G$ for D_M

18. STANDARD DEVIATION (σ) for D for D_M

19. MIN for D for D_M

20. MAX for D for D_M

21. *D (D with highest r^2) for D_M

22. * r^2 for D_M

23. *SE for D_M

24. *Y-INT for D_M

26. *D (D with highest r^2) for $\bar{D}_X$

27. * r^2 for $\bar{D}_X$

28. *SE for $\bar{D}_X$

29. *Y-INT for $\overline{D\chi}$

87. LACUNARITY for Image (L) = $\sum \Lambda(g)/G_N \forall g \in G$

88. CV for L

89. MIN for L

90. MAX for L

93. $L' = \text{MEAN } \Lambda'(g) \mid \Lambda'(g) = \text{REGRESSION LINE SLOPE for } \ln(\lambda(\emptyset)+1) \text{ vs } \ln(\emptyset)$

94. CV for $\Lambda'(g)$

96. $L\Omega = L$ for $\lambda\Omega$

98. CV for $L\Omega$

99. $\text{MEAN } D\Lambda(g) = \text{MEAN } (\text{slope}[\ln\sigma \text{ vs } \ln\epsilon]) - ((\text{slope}[\ln\lambda\epsilon, \text{ vs } \ln\epsilon])/2)$

116. $\overline{CV}$ for Count = $\sum C(\sigma/\mu)(g)/G_N \forall g \in G$

117. $\overline{CV}$ for Count/ $\overline{CV}$ for Ω

118. MEAN FOREGROUND PIXELS

120. TOTAL PIXELS

126. Mean Maximum $\emptyset$
